## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention: the subspecies wherein the rheometric material comprises a coating; the subspecies wherein the rheometric material is a strip of material wound around a longitudinal axis of a device body; the subspecies wherein the assembly material is disposed on a first outer surface of a device body opposite a second outer surface; the subspecies wherein a plurality of assemblies are disposed on a single first outer surface of a device body; the subspecies wherein a plurality of assemblies are disposed on a first outer surface and a plurality of assemblies are disposed on a second outer surface; the subspecies wherein the assembly is disposed within at least one lumen; the subspecies wherein the assembly is disposed along the entire length of the device body; the subspecies wherein the assembly is disposed at the distal end of the device body; the subspecies wherein the rheometric material comprises magnoactive material; the subspecies wherein the rheometric material comprises electroactive material; the subspecies wherein energy is applied to each assembly simultaneously; the subspecies wherein energy is applied to each assembly at different times; the subspecies wherein the stiffness is varied selectively by moving the device body within a passage; the subspecies wherein the stiffness is varied selectively by bracing the device body against movement; and the subspecies wherein the stiffness is varied selectively by moving fluid through the device body.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. A single disclosed species may include several subspecies to form a single working embodiment, as long as the particular chosen combination of subspecies has been disclosed in the specification. For example, the applicant may choose the subspecies wherein the rheometric material is wound about the device body, the subspecies wherein said material is disposed along the entire length of the device body, the subspecies wherein the material is magnoactive, etc., etc., as long as

Art Unit: 3762

the chosen combination of subspecies has been disclosed in a single working embodiment and the subspecies are not mutually exclusive. Currently, claims 9, 28 and 50 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
